CS3990. Assignment 1 (10 points)

HTML and CSS fundamentals: development of a personal website «Student's CV»

Your first task is to create a personal webpage "**Student's CV**".
The website should include <u>a minimum of 3 pages</u>.

Pages are related to each other as follows:

Web-paged	Has links to	has links to fragments of pages (specific location)
Main (№1)	№2, №3	Current page «Bottom», «Top»
№2	№1	Current page «Bottom», «Top», specific location within page №3
№3	№1	specific location within page №3, specific location within page №2

Your webpage must include the following *data (you can use imaginary data instead of revealing your own):*

Home page:
<u>Personal information:</u> first and last name, date and place of birth, marital status

<u>Contact details:</u> (tel., e-mail, Facebook, Instagram (if available), address of actual residence)

<u>Personal Skills and Qualities:</u> The qualities inherent in you, the general list of which should be individual. Personal skills are not hard skills which you can quantify and measure, such as computer programming skills or legal knowledge. Instead, they are soft skills – are intangible qualities or traits that are as, if not more, important to employers.

<u>Education:</u> information about the previous education, indicating the periods, names and places of educational institutions

<u>Professional knowledge and skills:</u> level of knowledge on the basic disciplines of your specialty and foreign languages (if there are certificates, specify the time and place of receipt).

Pages 2-3 content select from the list:

Additional education (courses, independent online education - indicate references to the educational resource and course)

Additional knowledge (apart from knowledge in the IT industry)

Hobby (a brief description of the features of each hobby, a photo of your results in this area or a link to resources where the information about the result or the project is placed)

Work and career of your dreams (provide a list of the names of the professions that interest you, a brief description, one paragraph, their features, give links to the pages of companies that you are interested in as employers and a description of the specifics of their activities, provide a list of resources, where are vacancies that interest you).

Favorite movies / books (link to web resource from which you can order or download, short description, year of release, genre)

3. The web site should contain the elements:

A page title, a favicon, character encoding, setting the viewport, a description of your web page – must be specified for each single web page.

Each page should include the following items with formatting (via CSS) as indicated:

Images (add a photograph of yourself to the Home page) - min 3 items on each page	All images have a 3px boarder with different colors A photograph of yourself - float to the left side of the webpage All images have different sizes
links (internal, external, anchors), at least one is an image, the text of the tooltip is given	All links have the same font style, but «Bottom», «Top» -bold font All anchors are implemeted via list items (look like buttons)
lists (numbered and bulleted), marker-lowercase letters	Alignment - in width.
Headers (h1, h2, h3)	all <h2>s - italic all <h3>s – have a background different font families for a Home page and 2 others <h3> for 3rd page - non-fat
Paragraphs - at least 3 for each single page	different sizes, colors and font types line spacing for paragraphs <p> at 30px

	a red line in paragraphs 30px for the 2nd paragraph <p> (of each page) - remove the red line

One of the pages should have an image as a background.

Use (at least once) the following selectors:
- tag selector;
- class selector;
- ID selector;
- grouping of selectors;
